Last Mile Struggles

Regulatory Compliance

Adhering to crucial protocols and regulations, including HACCP and ISO 22000, is vital for ensuring food safety and maintaining quality standards.

Delivery Control Issues

Insufficient oversight during delivery processes can result in operational inefficiencies and financial losses.

Risk of Tampering

The potential for tampering not only jeopardizes food safety but also poses risks of reputational damage and legal repercussions.

Need for Effective Monitoring

Continuous monitoring is essential to prevent issues and ensure compliance, helping to mitigate legal risks.

Impact of Improper Handling

Inadequate handling during delivery can lead to customer dissatisfaction, resulting in increased rejection rates.

Challenges in Employee Performance Monitoring

Difficulty in tracking employee performance and key performance indicators (KPIs) for last-mile services can hinder service quality and accountability.

Why Sbag?

Our patent-pending hardware solution can be attached to any bag to help secure delivery of food from restaurants to customers, or we can custom design our bag to suit your requirements. Each food delivery is tracked and recorded.

Ensuring Every Delivery, Every Time is Delivered Safely, Securely & With Care

Secured

Peace of mind tamper free delivery & safe guarding your company's reputation.

Detection of Mishandling

Monitor food handling to ensure food arrives as if it was cooked in the kitchen.

Monitoring Temperature

Ensuring food is delivered safely to ensure compliance to highest food level standards.

Stay in-control of your deliveries. Reduce Operational Costs. Deliver happy customers.

STEP 1

The sender places the food in the bag, secures it, and seals it.

STEP 2

The driver carries the food and receives real-time feedback & alerts during the trip to ensure the delivery is done safely, securely and is well handled.

STEP 3

Operations/management tracks the driver's performance using a real-time dashboard and can take action to improve performance through pre-set alerts

HOW IT WORKS

STEP 4

When the rider arrives, the receiver unseals the SBag.
